WORK EXPERIENCE

Appddiction Studio, Software Developer

October 2018 - Current

Technical Lead - Overseeing the 'Innovation Team', I'm responsible for familiarizing the team with new technologies to expand the capabilities of our company such as Microsoft PowerApps, WordPress, Power BI, Tableau, Drupal, Splunk, ServiceNow, Appeon, Pega and Microsoft Dynamics.

UI/UX Developer - Collaborated directly with the company's design team to redesign and update various websites for Appddiction Studio, including Codebound.com and Appddictionstudio.com. I was also responsible for developing working prototype applications for several commercial proposals.

Software Developer - Worked in a fast-paced Agile environment writing SQL queries, Java, JavaScript, CSS and HTML using Angular, my primary responsibilities include implementing the front end design and functionality of the U.S. military's EODIMS (Explosive Ordnance Disposal Incident Management System) application.
